Gowtham M

Frontend developer with a passion for creating visually appealing and user-centric interfaces. Proficient in HTML, CSS, and JavaScript, with a strong foundation in responsive design and UI/UX principles. Seeking to contribute my skills to a dynamic team and deliver engaging digital experiences.

Projects

To-Do-List

Link : <https://gowtham-mathiyazhagan.github.io/To-Do-List/>

- Creating a to-do-list involves building an HTML interface for task input and display, styling it with CSS to make it visually appealing, and using JavaScript to handle adding, marking as done, and removing tasks. You can enhance the functionality by incorporating features like task completion and deletion, and even implement local storage for persistence.
- A to-do-list helps users organize their tasks, making it easier to keep track of what needs to be done and when.
- By having a structured list of tasks, users can prioritize their work and increase their overall productivity.
- To-do-lists aid in managing time effectively by setting deadlines and allocating time to specific tasks.
- Users can create goals and track their progress by adding corresponding tasks to the to-do-list.
- Users can customize the appearance of their to-do list based on their preferences and needs.

Food Ordering Website

Link : https://gowtham-mathiyazhagan.github.io/Food_Ordering/

- Creating a food ordering website involves building an HTML structure for navigation, menu display, and checkout. Styling the website with CSS makes it visually appealing, and using JavaScript adds small action.
- The main landing page of website. It might feature an attractive banner with high-quality images of delicious dishes, enticing users to explore more.
- It adapts well to different screen sizes and devices, like smartphones and tablets, to ensure a consistent user experience.
- Navigation menu that allows users to easily navigate through different sections of website.
- Once users are ready to finalize their order, they might provide their delivery address, select a payment method, and review their order before confirming.
- The footer section of website could contain additional navigation links, contact information, social media icons, and maybe some legal notices or terms and conditions.

PERSONAL SKILLS

- Flexible, Innovative, Quick learner.
- Written and verbal communication abilities.
- Proficiency in diplomatically engaging and negotiating with individuals.
- Time Management
